ENDORSING RECOMMENDATIONS. - Several cases which illustrate the carelessness, to say the least, of Senators and Representatives in endorsing the papers of applicants for positions under the government have recently occurred in one of the departments. A distinguished Southern Senator called upon the head of the department referred to and demanded the immediate discharge of a certain clerk, on the ground that he was not and had never been a republican; besides this, he was grossly incompetent and totally unqualified to discharge the simplest clerical duty. The chief of the department listened courteously to these representations, and then mildly inquired: "If, as you say, Mr. --- is not a republican and is incompetent, why did you recommend him?"
"Recommend him! Why, sir, I never recommended him!"
"Excuse me, sir, but I think you did. Here," said the head of the department, ringing his bell for the messenger, "ask the appointment clerk to bring me the papers in the case of Mr. Mr. The papers were brought, and from them the chief of the department selected a letter, which he handed to the Senator with a significant smile. It was a letter written some time since by the Senator himself, strongly recommending Mr. --- for appointment, and vouching for his staunch republicanism and general qualification for the position sought. The Senator "acknowledged the corn," but said he had forgotten that he harmless, and yet accomplish all, and more, than had written such a letter.

THE BOOT-JACK. -- The introduction of the boot-jack makes quite an era in the history of civilization, now that we think of it. The savage of course, knew nothing of it, and he knows knothing of it now, except when it is hurled at his astonished head by an enlightened, though hasty, brother.

Boot-jacks came in shortly after the introduction of tight boots. Before that time men used to kick off their boots or sleep in them. We infer there are few boot-jacks in California, from the frequency of the epitaph, "died in his

of the man who had the temerity to pull on the first pair of tight boots, when he attempted to pull them off again, the boot-jack not being invented. How he must have wriggled and twisted, now prying away with the toe of one boot on the heel of the other, the heel slipping off and striking him on the tenderest part of his shinbone. Again, catching the toe under the other leg, he works away at the heel with his hand; but all in vain. At last he tries the crotch of a tree, and the thing is done. Any

BANKING.—The Philadelphia Ledger says that banking in England is an exceedingly profitable business. Taking the twenty-five banks in London, and their branches in the country, the green profit is \$1.107.444; expenses country, the gross profit is £1,197,444; expenses £418,815; net profit £778,929—so only about 35 per cent. of the gross earnings is expended in the cost of the business, whilst in other countries it is 48 per cent. Another cause of the larger profits is there are fewer rash ventures, larger profits is there are fewer rash ventures, aug 25

THE FOLLOWING WILL BE READ ▲ WITH INTEREST: Under date of April 26th, 1871, Dr. HENRY J. ROGERS, 68 Sharp street, Baltimore, an em-

inent physician, writes regarding

promptly attended to.

CRYSTAL DISCOVERY: "It affords me much pleasure to bear testimony as to the efficacy of your Crystal Discovery. Some years since, while in India, I suffered from a severe fever peculiar to the country. On my recovering, a patch of hair on the left side of my head became perfectly white, without at all affecting the remainder To remove this unsightly appearance, I had recourse to various preparations, both in Europe and in this country; but they all land one great defect—they dyed the hair black. Now, with your Crystal Discovery, I can get the desired shade—the natural color of

my hair being dark brown. I consider your Discovery the best preparation I know of. Yours truly, HENRY J. ROGERS. Now as the fact becomes more patent every day that the various dirty and filthy preparations advertised as Renewers, Restoratives, &c., are but compounds of Sugar of Lead and Sulphur, and therefore should be shunned by all who value their health, it is scarcely a matter of surprise that the demand for NATTANS' CRYS the poisonous articles claim to do, should have increased so rapidly. It restores the color and growth of the hair positively in a few days; strengthens the roots, makes an excellent dressing, soiling neither clothes nor scalp; but on the contrary it gives the scalp a pure and cleanly look, removing all dandruff and scurf. It is the most economical preparation in use. Put up in

large bottles, at one dollar. ARTHUR NATTANS, Inventor and Sole Proprietor, WASHINGTON, D. C. For sale in Alexandria by WARFIELD & je 27-eoly HALL.

SEWING MACHINES.

HOWE'S

Lock-Stitch Sewing Machines

Are world-renowned for durability and simplicity of machinery, the perfection of the tensions, and the unparalleled wide range of work they are capable of performing without change or readjustment.

At the great "Exposition Universelle" in Paris, in 1867, they were awarded the highest prize -a massive Gold Medal--over 52 competitors, and the Grand Cross of the Legion of Honor was conferred on Elias Howe as the original inventor of the Sewing Machine.

The growing appreciation of their characteristic excellence by the intelligent people of this country was clearly shown by the unprecedented sales of the Howe Sewing Machine during the past year, being far in excess of those of any other one patent. More than 1000 of these excellent machines

are in daily use in the cities of Washington and Georgetown, and of this very large number a anteed single case of dissatisfaction cannot be found. They make the "Howe," or "Lock-Stitch," which has the same beautiful appearance on

either side of the fabric sewed, and they are the only machines that make this beautiful stitch to perfection. A branch office has been recently established

at No. 105, King street. If you are prejudiced in favor of any particular machine, at least examine the Howe before you purchase. Remember that Mr. Howe was the original inventor of the Sewing Machine, and gave twenty years of his life to perfecting this machine. Every Howe Machine is warranted for ten

years' constant use by the company, and is kept always in perfect order by the local agency. Purchasers are thoroughly instructed at their residences, by competent instructresses, in every variety of plain and ornamental sewing.

An efficient lady operator will be in constant attendance at the office, and machine stitching of every description will be neatly and promptly J. KARR, General Agent, 629 Pa. av., Washington, D. C., and 105 King st., Alexandria, Va.

VIRGINIA ADVERTISER, (For the Country,)

COLORED BISHOPS ON THE RACE QUESTION. The Indiana Conference of African Methodists held its yearly session in Chicago last week, and the white Methodist pastors sent a committee of their num ber to extend a fraternal welcome. The Chairman of the committee Rev. Dr. Reid, of the Northwestern Christian Advocate, in the course of his speech expressed a hope and belief that the white and black Methodists would soon be united under one roof-tree. This brought up Bishop Brown, who said that for fifty years the colored body had been on the defensive. They were willing to bury the tomahawk. But there would have to be a deal more courting before the proposed marriage could be consummated. All he wanted was freedom to do as he pleased in a free country. There had been a damnable heresy in the Church which prevented the black man from kneeling at the same altar, or attending the same church, and for his part he really needed a great deal of grace from God to forget all the injuries received at the hands of the white man. He did not like to see his white brethren dodge from one sidewalk to the other when they saw him coming. His people were willing to exchange visits with the white people, but he feared he might backslide some if forced to remain under the same roof-tree. Bishop Campbell followed in the same vein. He loved the Methodist Church. But he was not educated yet up to the point of union with it-nor were his white brethren. He believed, however, that the time would come when the latter "would recognize the fact that Brother Brown and Brother Campbell could preach a tolerably

his daughter.

Imagine the perplexity and embarrassment

one could invent a boot-jack after that.
